Substantive Area of Interest

My core areas of research fall within the fields of mental health and substance abuse. Particular attention is paid to diagnostic reliability/validity, treatment efficacy, and ethics. I focus on how these issues manifest within the topic of child and social welfare policy. Complementary areas of interest include research methodology, statistical inference, open science/meta-research, and the philosophy of science.

Areas of Specialization

Mental Health/Substance Abuse (esp. psychiatric medications & diagnosis), Statistical Inference

Areas of Competence

Research Methodology, Philosophy of Science, Ethics, Child Welfare, Social Welfare Policy

Academic Experience
